December 27, 2018

Dear Resident:

Beginning next week, you will begin to see Hooper Corporation Electric Crews upgrading the overhead electric lines in your area along Roberts Street. They will be replacing poles, wires, transformers and street lights. This work is part of the \$10.7 Million loan that the City obtained to improve our City Electric System. The lines that are being replaced are the major backbone for the circuit that feeds most of the core city.

This project is expected to last through the end of April 2019. During this time, the crews will be working the system "hot" which means that your power should not be affected unless they are replacing the transformer that actually feeds your house. All efforts will be made to contact individual residents prior to any planned outage.

In some areas, we will be locating new poles 3 - 4 feet behind the existing ones in order to move the poles further from the travel lane of Roberts Street.

If you have any questions, please reach out to Mike Null, Assistant City Manager at (904) 297-7012 or via email at mnull@greencovesprings.com.

Thank you,

Mike Null
